

Brandt Dew Down

Features

- Reduces surface tension of water
- Helps to eliminate soil compaction and dry spots
- Ensures more even distribution of spray solution
- Creates a healthier root system

BRANDT DEW DOWN is a biodegradable non-ionic wetting agent that effectively reduces the surface tension of water to allow faster and deeper penetration into the soil.

BRANDT DEW DOWN helps to eliminate soil compaction, dry spots, and creates a healthier root system for more vigorous growth.

Application Recommendations

BRANDT DEW DOWN can be used with most insecticides, fungicides, herbicides, defoliants and anti dessicants to improve performance by ensuring more even distribution and wetting over the plant surface. To wet and spread most chemicals, use 1 pint per 100 gallons to treat one acre.

Greens and Tees

Use BRANDT DEW DOWN early in the season to improve water penetration, absorption, and retention at the rate of 1 quart per 100 gallons. Each 100 gallons should treat 1 acre. Spray greens and tees at 2 week intervals throughout the warm weather months.

Fairways and Athletic Fields

Use BRANDT DEW DOWN at the rate of 1 to 2 quarts per 50 gallons of water to treat 1 acre.

Lawn Care

Use BRANDT DEW DOWN at the rate of 2 to 3 gallons of water per 1,000 square feet of lawn.
