

# Brandt EDTA Copper

## Chelated Trace Elements

### General Recommendations

EDTA COPPER is designed for use in liquid fertilizers and suspensions as a soil application for all crops requiring Copper.

### Row or Band Application

Apply 1.5-3 pints of EDTA COPPER per acre, just before or at planting time.

### Broadcast Application

Apply 2-4 pints of EDTA COPPER per acre, just before planting and work into the top 3-5 inches of soil.

**Note:** For foliar application, EDTA COPPER may be used at the rate of 1-2 pints per acre with a minimum of 20 gallons of water. Or use BRANDT GH COPPER for foliar applications.

*Optimum rate of application will vary between fields, depending on soil pH and organic matter content. For best results, follow soil test or plant analysis recommendation.*
