# Manni-Plex<sup>®</sup> for Small Grains

## General Information

Manni-Plex products are specifically formulated for foliar delivery of micronutrients.

## Foliar Application

Use 1-2 quarts MANNI-PLEX FOR SMALL GRAINS per 10-20 gallons per acre per application throughout the growing season as a maintenance program. More frequent applications at 2 quarts per acre may be needed to correct deficiencies once they occur. Do not add to liquid fertilizers containing phosphates.

## Aerial Application

Use 1-2 pints MANNI-PLEX FOR SMALL GRAINS per acre with 2 gallons of water. Multiple applications are recommended for best results.

## Soil Application

BRANDT EDTA products are recommended for soil applications with NPK solutions or for harsh soil conditions where a chelated micronutrient is desired.

**Warning: Some crops may be injured by the application of Boron. This product contains Copper. Copper nutrients have been found to cause phytotoxicity with certain fungicides. Read label before mixing.**

*MANNI-PLEX FOR SMALL GRAINS may effectively be applied with many agricultural chemicals. For unfamiliar tank mix combinations sufficient evaluation to determine efficacy and crop safety may be warranted. Avoid tank mixing with phosphate and/or excessively alkaline based fertilizer solutions. Use a minimum 10 gallons of water per acre with ground spray equipment and a minimum of 2 gallons for aerial application. Optimum rate of application will vary depending on your soil properties such as soil pH, organic matter content, soil texture, weather conditions, time of year, general crop health and species. For best results, follow soil test or plant analysis recommendation.*

Derived from Copper Nitrate, Manganese Nitrate, Zinc Nitrate, Urea, and Sodium Borate. F76

## Mixing Instructions

Put 1/3 to 2/3 of total desired water volume in tank. Add adjuvant(s) if desired and agitate until thoroughly mixed. Add pesticide(s) if desired and agitate until thoroughly mixed. Add desired amount of MANNI-PLEX FOR SMALL GRAINS and agitate until thoroughly mixed. Fill tank with remainder of desired water. A jar test is a good field practice for evaluating compatibility of multiple chemical mixtures. **Caution:** Check compatibility with chemical mixtures and high phosphate and alkaline (high pH) solutions.

**Weight per gallon: 10.0 lbs**

**Freezing temperature: 32°F**

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

**CAUTION:** Harmful if swallowed. Avoid contact with skin, eyes and clothing. Causes eye irritation. Avoid breathing spray mist. Wash hands after using thoroughly after using. In case of eye contact, flush eyes with water for at least 10 minutes and get medical attention.

**STORAGE AND DISPOSAL:** Do not contaminate water, food, or feed by storage or disposal. Store in a cool, dry, locked area out of reach of children. Protect from excessive heat or cold. Triple rinse (or equivalent) and dispose of container in accordance with local, state and federal regulations.

**Warranty:** Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
