

Brandt MSO

Spray Adjuvant/Methylated Seed Oil

Product Data Bulletin

Features

- Designed for use with herbicides, insecticides, fungicides, defoliants and desiccants
- Quick wetting and uniform droplet distribution
- Improves wetting, spreading and penetration

MSO is a multifunctional spray adjuvant developed as a penetrating surfactant concentrate with superior wetting and penetrating characteristics. MSO is designed as a replacement for non-ionic surfactants and crop oil concentrates in liquid spray mixtures. When used as directed, MSO maximizes the activity and effectiveness of certain herbicides in post emergence applications. Therefore, care must be taken in treating sensitive crops during periods when plants are subjected to drought stress, high temperatures, and high humidity.

Directions for Use

Use BRANDT MSO at a rate of 1-2 pint/acre as a replacement for non-ionic surfactants and crop oil concentrates. The high end of the recommended use rate may be necessary during periods when plants are subjected to extreme stress or weed populations.

The addition of a liquid fertilizer (28-32% nitrogen solution) may also be required to improve control under extreme environmental conditions. Always add MSO last to the spray mixture and provide good agitation.

Prior to use, read and follow all directions on this label and on the label of the pesticide being used. The pesticide manufacturer's label for specific usages and restrictions have precedence over DIRECTIONS FOR USE referred to on this label.

Principal Functioning Agents

Methylated Vegetable Oil and Surfactant Blend	100.0%
Total	100.0%

All ingredients are exempt from the requirements of a tolerance under 40 CFR 180.
