WARNING: Keep out of reach of children!
Dispose of container in accordance with local, state & federal regulations

GENERAL RECOMMENDATIONS

For use in a fertility program for all crops requiring calcium and Magnesium

FOLIAR APPLICATION: Use 1-2 quarts **ClawEI** Cal-Mag per 100 gallons per application throughout the growing season as a maintenance program. At least 3 applications are recommended. More frequent applications at 3 quarts per 100 gallons may be needed to correct deficiencies once they occur. Use a minimum of 20 gallons of water with ground spray equipment.

SOIL APPLICATION: Use 2-4 quarts **ClawEI** Cal-Mag per 100 gallons as a preplant or sidedress application.

Optimum rate of application will vary between fields, depending on soil pH and organic matter content. For best results, follow soil test or plant analysis recommendations.

MIXING INSTRUCTIONS

1. Put 1/3 of water in tank
2. Add other chemicals, if any
3. Fill tank with balance of water
4. Add correct amount of **ClawEI** CaMg
5. Agitate adequately to mix

CAUTION: Check compatibility with orthophosphates, high potash suspensions, and chemical mixtures.

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
