Dispose of container in accordance with local, state & federal regulations

0-0-0 MINIMUM GUARANTEED ANALYSIS

Calcium (Ca) 3.0%

Calcium Chelate derived from
Ethylenediaminetetraacetate

GENERAL RECOMMENDATIONS

ClawEI CALCIUM is designed for use in all liquid fertilizers and suspensions as a soil application for all crops requiring calcium.

ROW or Band APPLICATION: Apply 2½-5 pounds (1-2 quarts) ClawEI CALCIUM per acre, just before or at planting time.

BROADCAST APPLICATION: Apply 5-10 pounds (2-4 quarts) ClawEI CALCIUM per acre, just before planting and work into the top 3-5 inches of soil.

NOTE: For foliar application, this product may be used at the rate of 2-4 pounds (1½-3 pints) per acre with a minimum of 20 gallons of water. Or use **ClawEI CALCIUM gold label** for foliar applications.

Optimum rate of application will vary between fields, depending on soil pH and organic matter content. For best results, follow soil test or plant analysis recommendations.

MIXING INSTRUCTIONS

1. Put 1/3 of fertilizer in tank
2. Add correct amount of ClawEI
3. Fill tank with balance of fertilizer
4. Add other chemicals, if any
5. Agitate adequately to mix

CAUTION: Check compatibility with orthophosphates, high potash suspensions, and chemical mixtures.

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
